Zend

June 2015

https://www.zend-zce.com/en/yellow-pages/ZEND027501

OBJECTIVE

I would like to implement my skills and experience in practice.
Check my knowledge in a new and interesting project, receive new experience and meet new challenges in my work.
I will be happy to deliver a new idea from scratch paper to the end user.

WORK EXPERIENCE

UVO
Full Stack Software Engineer

(October 2012 - Present)

I have worked as a Fullstack Software Engineer. A lot of challenges and difficult tasks. Created projects, support legacy. I have implemented new features, new integrations, and payment methods. Have created google-chrome extensions, google-doc addon, moodle LMS integrations, canvas LMS integrations (LTI), google auth, stripe, paypal and many others.
Create multiple SPA's, Redux, MobX, Symfony, Doctrine, etc.
Design APIs, implement APIs, create dashboards in grafana, document API in swagger.

Intuitec
Full Stack Software Engineer

(July 2010 - September 2012)

I have created a couple of project with Yii framework, JS, database architecture, integrations with google calendar and createing custom calendar UI based in jQuery, with drag&drop events, schedules, etc.

Weblancer
Fullstack Web Developer

(August 2009 - July 2010)

Freelancer
Name of service: weblancer.net
Reference to reviews in Russian:
https://www.weblancer.net/users/thebucefal/reviews/?type=positive
I have created a lot of parsers and other small scripts. Fix websites etc.

EDUCATION

Kiev radio-mechanical college of NAU
Computer programming

(September 2006 - September 2010)
